1. ☐ 5/9/1 (Item 1 from file: 347) 03167893**VOICE POS TERMINAL****PUB. NO.:** 02-143393 [JP 2143393 A]**PUBLISHED:** June 01, 1990 (19900601)**INVENTOR(s):** UEDA HIDEAKI**APPLICANT(s):** NEC CORP [000423] (A Japanese Company or Corporation), JP (Japan)**APPL. NO.:** 63-297648 [JP 88297648]**FILED:** November 24, 1988 (19881124)**INTL CLASS:** [5] G07G-001/01**JAPIO CLASS:** 29.4 (PRECISION INSTRUMENTS -- Business Machines)**JAPIO KEYWORD:** R108 (INFORMATION PROCESSING -- Speech Recognition & Synthesis)**JOURNAL:** Section: P, Section No. 1094, Vol. 14, No. 385, Pg. 10, August 20, 1990 (19900820)**ABSTRACT**

PURPOSE: To confirm the prices of pieces of **merchandise** and total amount by a customer even when the customer does not carefully watch a display by displaying the names and the prices of the pieces of **merchandise** and the total amount on the display and outputting the information with a voice having a proper speed.

CONSTITUTION: When the pieces of **merchandise** are the boxes of caramels, and the price of each box of caramels is 182 yen, while the price is displayed on the display, either high speed vocalization data 7 or low speed vocalization data 8 are selected according to the interval between the inputs of respective **merchandise** codes from a scanner, and '182 yen' is vocalized. Next, when a 'total' key in a keyboard 1 is pressed down, a POS terminal control part 6 receives the signal, outputs a signal for displaying the total amount of the pieces of registered **merchandise**, prepares a vocalization code corresponding to the total amount, and outputs the prepared vocalization code to a voice synthesizing part 5. At this time, low speed vocalization is designated for the designation of a vocalizing speed for the voice synthesizing part, and the total amount of the pieces of purchased **merchandise** is accurately informed to the customer. Thus, the customer can confirm the prices of the pieces of **merchandise** and the total amount with the proper voice.
